

PAN基碳毡(石墨毡)
PAN base carbon felt
(graphite felt)

产品特点：聚丙烯腈基碳纤维毡是由聚丙烯腈基纤维经过无妨、针刺工艺制的毡体、并通过合理的预氧化、碳化工艺生产获得、该产品是工艺成熟、性价比高、用途广泛的高温隔热材料。

Product features: The polyacrylonitrile-based carbon fiber felt is a felt product made from polyacrylonitrile fibers through harmless and needle-punching processes, and is produced through reasonable pre-oxidation and carbonization processes. This product is a mature technology, cost-effective, and widely applicable high-temperature insulation material.
